

## **SCSC ORGANIZED FIRE PREVENTION, FIREFIGHTING AND RESCUE DRILL**

On December 16<sup>th</sup>, 2025, at SCSC Office Building, SCSC coordinated with Fire Prevention, Fire-fighting and Rescue Police Team – Area 14 (PC07 Department) to organize a fire prevention, firefighting and search and rescue drill, aiming to enhance safety awareness and emergency response capabilities.

The drill was conducted based on a simulated scenario of a fire breaking out within the building, requiring the mobilization of personnel, equipment and the implementation of firefighting and rescue measures. The fire prevention, firefighting and rescue Police Team Area 14 – PC07 Department deployed specialized fire engines, organized high-pressure water spraying formations and approached the scene quickly and effectively.

Throughout the drill, participating forces coordinated closely, strictly complied with professional procedures and skillfully operated firefighting equipment, ensuring absolute safety for both people and property. The drill was carried out seriously, according to plan and successfully achieved its set objectives.

Through this activity, employees and customers working at SCSC were further equipped with knowledge and practical skills related to fire prevention, firefighting and rescue, thereby enhancing proactive risk prevention awareness and readiness to coordinate with functional forces in case of incidents.

SCSC always considers fire prevention, firefighting and rescue as an important task, contributing to the development of a safe, stable and sustainable working environment.
